

Ceramic Scissors

INNOVACERA
technical ceramic solutions .com

Trimming is neat and convenient, making it more reassuring to use.

The blade is polished at an obtuse angle, which is not easy to hurt hands and wear out.

Features

1. Rust-proof, lightweight, non-conductive and easy to clean.
2. Blades last 11.2x longer than traditional blades.
3. Clean, straight cuts, are non-reactive and will keep foods or herbs fresher longer.

Applications

- Cutting string, paper, and plastic
- Sewing and crafting
- Opening food packaging
- Trimming flowers and plants
- Laboratory work
- Especially suited for a variety of applications in moisture-prone environments including the kitchen, garden, and outdoors.

Ergonomic Handle

Easy Cutting.
Scientific design of handle, comfortable and effortless.
Anti slip and durable.

Hygiene and health, not contaminated with food juices.

The handle conforms to human mechanics, with a rounded and non slip shape, providing a comfortable grip.
